

Control Units

Control Unit DA.93AM

230 V A.C. control panel for leafed gates with one or two motors. It functions with a microprocessor and is ready for connecting all safety and control equipment to an extractable terminal block. It is equipped with motor torque adjustment and LED indicator. Pedestrian crossing and pre-blinking (lamp starts blinking before the motor starts) are among its main functions.

Control Unit DA.24A

Microprocessor control panel for leafed gates, suitable for controlling one or two 24 V D.C. motors, max. 150W. Ready for connecting all safety and control equipment to an extractable terminal block. It is equipped with adjustable-speed braking devices and amperometric sensor for obstacle detection. Among others, suitable for apartment houses and pedestrian applications. It can be connected to buffer batteries.

Control Unit SB.02

230 V A.C. control panel for overhead doors with one or two motors suitable for parallel coupling, constructed with miniaturized components. Ready for connecting all safety and control equipment to an extractable terminal block.

Control Units

Control Unit DA.24B2

Microprocessor control panel for overhead doors, suitable for controlling one or two 24 V D.C. motors, max. 150W, in parallel. It is ready for connecting all safety and control equipment to an extractable terminal bloc. It is equipped with adjustable-speed braking devices and amperometric sensor for obstacle detection. It can be connected to buffer batteries.

Control Unit DA.C15

Microprocessor control panel for sliding gates requiring 230–400 V A.C. mains, maximum motor power = 1,5 HP. It is equipped with diagnosis leds and push-buttons and is ready for connecting all safety and control equipment to an extractable terminal block.

Control Unit DA.2XS433

Small-size, microprocessor control panel for electrical rolling gates, blinds and roller shutters, 230 V A.C. for one motor upto 500W without power adjustment with radio-receiver built-in. Type DA.2XSE433= with electro-lock

Control Unit ST99R-BT/12V

Control unit 12 VDC for one or two motors.
