## **SB.24 Heavy Duty Lockable/Padlock Type Removable Bollard**

**The SB24 is manufactured from high quality rugged Steel Tube and is designed to fit into a hinged, cast iron base flush at ground level.**

Primarily designed to discourage shop-window ram-raiders, it is also used to cordon off pedestrianised areas at shopping centres, etc., and is suitable for any security application that requires a totally flat surface after removal.

The bollard has two lifting handles for ease of removal and is secured into the base with a padlock (Not Supplied). After removal of the bollard, the cast hinged security flap is lowered to seat firmly into the base, leaving the surface level free from projections. The base flap is fitted into the ground to a depth of approximately 300mm and comes complete with flap lifting hook.

Material specification	95mm OID, 3.25mm gauge steel tube.
Height of the bollard above ground	1000mm.
Standard colour	Black, nylon coated with a white band mid-way.
